The Lippe Plant – Services & Products

Input from external companies [t]
Internal circulation of materials [t]
Production-related losses [t]
Output to external companies, materials recycling [t]
Output to external companies, energy recovery [t]
Internal use of produced energy [MWh]
External use of produced energy [MWh]

Waste that must be collected 1 and treated in acc. with specific requirements to prevent the spread of infection

Output 494,700t raw materials to external companies*

Input 981,100t from external companies*

* A further approx. 400,000t of different materials are moved between the on-site facilities

Output 222,300 MWh energy

114,600 MWh steam & electricity supplied to Lippe Plant facilities

Output 158,600 MWh

Output 63,700 MWh

Input 981,100t from external companies

Production-related losses [t]
Output to external companies, energy recovery [t]
Internal use of produced energy [MWh]
External use of produced energy [MWh]
