When it comes to water, we really are in our element

From supplying private households with top quality drinking water, to providing industrial businesses with process water, all the way through to treating wastewater and recycling sewage sludge and any other residual materials – REMONDIS has the know-how to create perfect water management systems.

Sewage Treatment Plants

Wastewater treatment

---

Treatment of municipal and industrial wastewater at state-of-the-art plants and facilities using multi-stage processes (mechanical/physical, biological & chemical systems)

---

Resources

Recovery of phosphorus

Recycling residual materials

Energy

Co-digestion

Contracting work

---

When it comes to wastewater, it is not a case of simply disposing of it. Moreover, we transform the organic contents into energy and recover any recyclable materials from the wastewater so they can be reused.

---

When it comes to water, we really are in our element.

From supplying private households with top quality drinking water, to providing industrial businesses with process water, all the way through to treating wastewater and recycling sewage sludge and any other residual materials – REMONDIS has the know-how to create perfect water management systems.

---

Sewage treatment plants are not a place for simply disposing of wastewater but are complex recycling facilities that produce clean water, energy and materials, such as the vital raw material phosphorous.
